

Bulk Tank Additive Applicators - Product Information

Fully Automated - or Keypad Entry Option

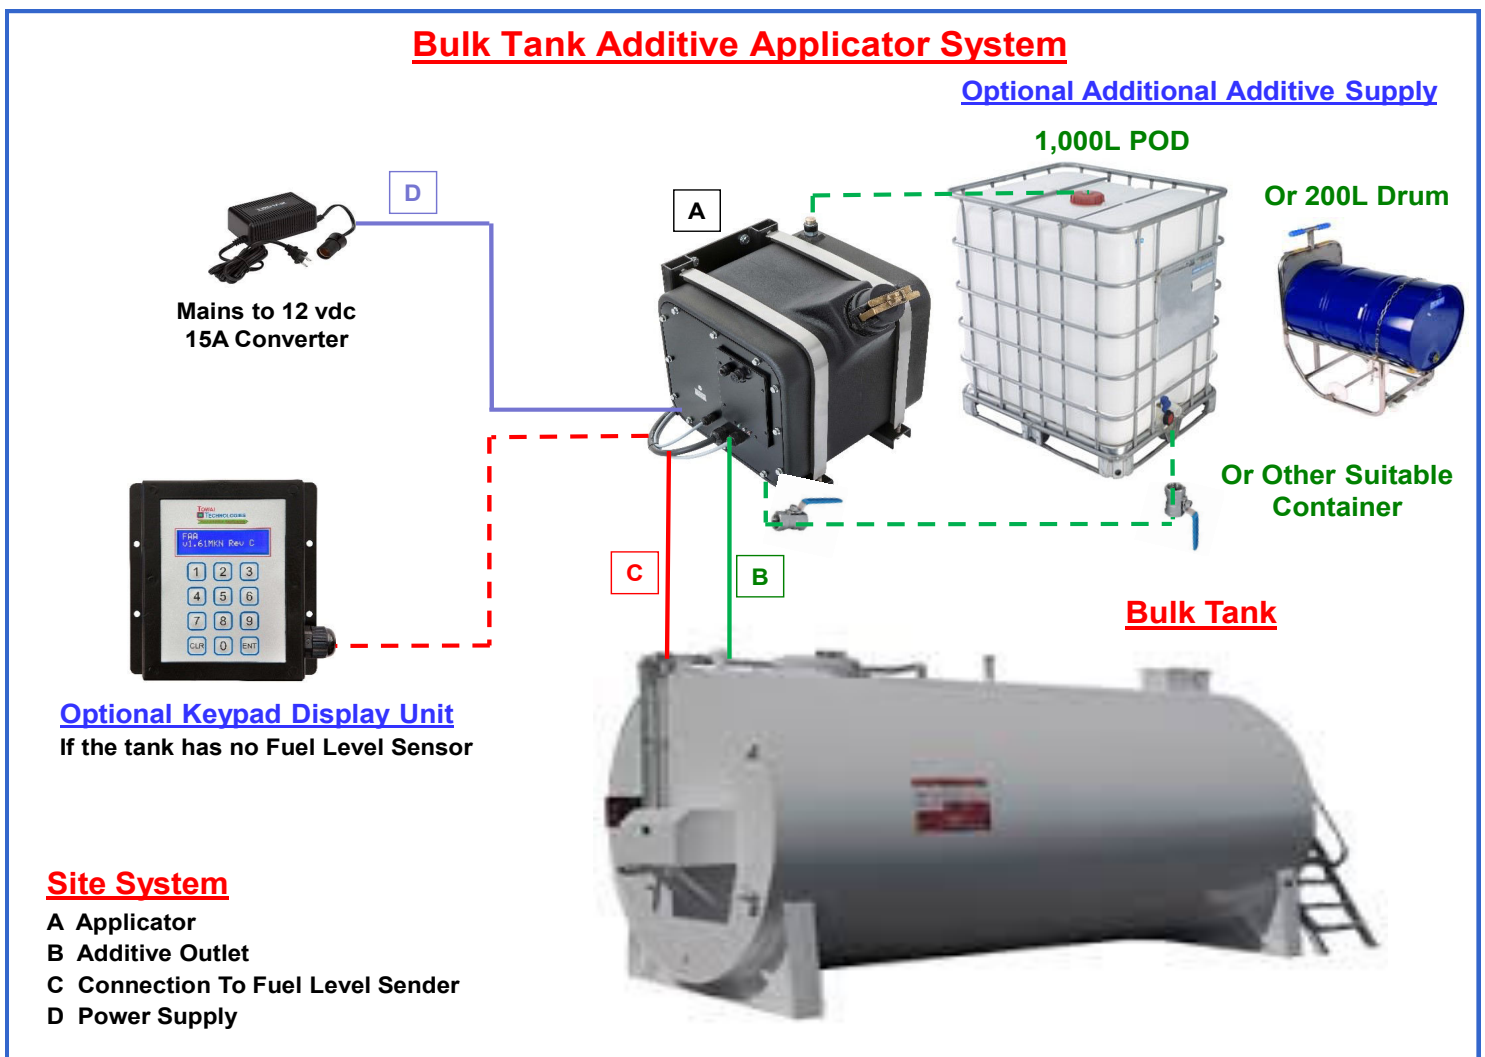

DESIGNED FOR HARSH FUELLING DEPOT ENVIORNMENTS

- Based on our Maxi Fuel Additive Applicator - 20 L
- Doses directly into bulk tanks
- Doses during fuelling to ensure thorough mixing of the additive
- Automatic with no operator involvement required

RUGGED COMPACT DESIGN

- All key components protected inside unit
- Long life pump & solenoid valve
- Industrial specifications
- Control board conformal coated

A BREAKTHROUGH - Injects fuel additive directly into bulk storage tanks automatically, or by keypad entry

The BTAA is a modified Maxi FAA with a larger pump and solenoid valve
 Connects via a fitted fuel tank level sensor, or via a Keypad Display Unit
 The main customer supply site installation requirements are:

- Site mounting arrangements
- Power supplied from mains supply via a 12 volt DC, 15 amp converter
- Optional additional additive tank or container
- All external wiring & tubing
